

# Feeding the Fish

## Supernova 3

Pixel-Poi® & Light Juggling Performance

### Performance Information:

A slickly choreographed act with 3 dancers wearing Pixel Video Suits (LED illuminated costumes that display moving graphics and logos), performed in partial light to an upbeat soundtrack.

<b>Performers:</b>	<b>3</b>
<b>Technician:</b>	<b>1</b>
<b>Running Time:</b>	<b>5 or 7 minutes</b>
<b>Minimum space:</b>	<b>5m wide x 3m deep</b>
<b>Minimum height:</b>	<b>2.5m</b>

### Technical Requirements:

Staging:	Obstacles (lecterns, monitors, autocue systems etc.) should be cleared from the stage. Please ensure no audience members are within 1 metre of the stage for safety.
Lighting:	Very low level of lighting is required - either: - A deep/congo blue wash at (typically) around 5-10%. or - 4 x Crossing narrow beams in deep blue. 2 pointing from stage left to stage right, 2 pointing from stage right to stage left. Focussed upstage of the performers.  Desired effect is to silhouette the performers without actually illuminating them from the front. The illuminated costumes look best when there is virtually no background light. Ultra-violet light / UV / Black-light should NOT be used.
Backdrop:	Black background if possible
Sound/P.A. System:	Adequate sized PA system, CD player or computer with USB and operator to be provided.  The Video Suits are synchronized to the millisecond with the music, so soundtrack must be played at normal speed (Pitch at 0).
Access:	Performers require 1 hour to set up backstage, prior to technical rehearsal. Then 30 minutes onstage rehearsal with lights, sound and a sound operator. Please allow 1 hour before the show for the artists to get into costume.
Backstage:	1 x secure lockable dressing room/changing area to be provided. Containing: 1 x trestle table (1m 80) 1 x hanging rail 4 x chairs 1 x mirror 2 x Power supply (standard 220/240V) required. Access to toilet and water. Light snacks and soft drinks are also requested.  If possible a space large enough to warm up is also requested.
